Recommendation: The use of commercially available cleaning agents (e.g. brushes, cleaning cloths etc.) is recommended. The gloves should be checked to ensure they are intact before being used again.

Restriction: Washing or dry-cleaning should only be carried out after consulting an accredited firm of specialists. For changes to the properties the manufacturer is not able to accept any liability here.

Pictograms and power levels according DIN EN 388:2003 CAT II

parameter	result
Abrasion (EN 388)	4
Cut resistance (EN 388)	4
Tear resistance (EN 388)	4
Puncture resistance (EN 388)	3
Dexterity (EN 420)	5

The period of use depends in particular on the particular application, the degree of stress and wear, but also by other criteria, such as a regular care and proper storage. Indicators of a possible reduced protection performance are for example:

- visible major changes at the product (for example, chafe, thinning, cracks, holes)
- damaged seams (as open or frayed seams).

Generally, the product should be checked before each use for wear, damage, or other changes, and if necessary replaced. There is currently no evidence that the products when properly stored (for example, dry, dust-free, dark) cannot retain their properties for many years.
